PARTNERS

- **Project owner:** Ministry of Natural Resources and Environment, Department of Climate Change, Viet Nam
- **Provincial partners:** Department of Agriculture and Rural Development with sub-departments for Water Resources, Crop Production and Protection, Forestry and Aquaculture; Provincial Extension Centre; Department of Natural Resources and Environment; Hydro-meteorological Centre; and Farmers' Union
- **District partners:** District Department of Agriculture and Rural Development and Farmers' Union
- **Donor:** The Federal Ministry for the Environment, Nature Conservation and Nuclear Safety (BMU) through the International Climate Initiative (IKI)

ISSUE

Ha Tinh Province in central Viet Nam is facing multiple challenges on its development pathway. Agricultural livelihoods are constrained by difficult climatic conditions: prolonged drought and hot dry winds during early summer, tropical storms and flooding in autumn, and cold drizzle in winter.

With an increasingly erratic climate, many hazards are expected to intensify and become more frequent, putting rural and urban livelihoods and ecosystems under pressure.

PROJECT OBJECTIVES

EBA/CSA

Improve the adaptive capacity and livelihoods of female and male farmers in Ha Tinh through implementation of EbA/CSA (Ecosystem-based Adaptation, Climate-Smart Agriculture) measures as well as gender-sensitive intensification approaches.

SCALE UP

Increase scale through the governmental systems and others: Develop the necessary capacities of stakeholders for integration of EbA/CSA into programs and strategies.

EbA/CSA IMPLEMENTED INTERVENTIONS IN HA TINH PROVINCE

Fruit tree-based agroforestry, Apiculture in agroforest & forest system

Son Tien & Son Hong communes, Huong Son district
Dong Loc commune, Can Loc district
Phuc Dong & Loc Yen communes, Huong Khe district
Ky Tay commune, Ky Anh district

Drought tolerant grass

Son Tien commune, Huong Son district

Ha Tinh map from bandovietnam.com.vn

Local "Tam" onion and bean rotation, linked with OCOP

Vuong Loc commune, Can Loc district

Giant freshwater prawn - fish rotation with agroforestry

Vuong Loc commune, Can Loc district

Direct beneficiaries: 1250 households
Indirect beneficiaries: >10,000 people

IMPLEMENTATION

Knowledge shared

>1250 farmers
Trained by SIPA project

>1000 households
Under Ha Tinh Farmers' Union's homegarden improvement program

600 households
from the Village Savings and Loan Association for agricultural groups

234 households
Core farmer
